

SomaPet™ Elite Dietary Supplement

SomaLife

For Health, Vitality and Longevity

Maximize Healthy Cell Regeneration

What is SomaPet?

SomaPet is an all-natural, vegan, whole food supplement specifically designed to deliver optimal nutritional support to your pet. Healthier skin and coat, a reduction in body fat, and renewed vigor and vitality are some of the many health improvements you will notice in your beloved domestic companion when you add this revolutionary product to their diet.

SomaPet is a proprietary combination of organic, pure free-form crystalline amino acids that encourage the production of additional healing, repair, and growth factors that jumpstart your pet's natural processes of cell repair and regeneration. It is the same formulation as SomaLife's flagship amino acid supplement, "Youth Formula" . . . it simply remains in a powder form so it can be easily sprinkled onto your pet's food. Literally, tested on humans first . . . SomaPet is the ultimate supplement for your pet, providing their body with everything it needs to maintain healthy energy levels, improve bone strength, and noticeably decrease the signs of aging.

SomaPet — For the Life of Your Pet!

Testimonials

"I am a top breeder of Egyptian Arabian horses and have bred a number of reserve champions, one is presently valued at over \$250,000. I have found SomaPet to be an important element in the health and well-being of all of our animals. Thank you SomaLife."

F. J. W. (Sunshine Farms) London, ON

"I am an International Judge qualified by the Canadian Kennel Club. I judge not only in Canada, but across the world. I am also a breeder of German Shepherd dogs that are sold internationally. Our dogs range in price from \$1,000 for puppies to \$15,000 for older dogs. Often we run into problems because of inadequacies in dog food, so I was asked to try SomaPet. Some of the older dogs started acting like puppies again, their coat is shinier, and they have more energy. With infertility, the dogs that weren't producing for us started producing for us. Overall we have found wonderful results with SomaPet and so have the people that we referred the product to."

L.A. Rosser, MB

"Fluffy is 20 years old and is my daughter's Persian cat . . . last year she began to spend more time indoors and was less active. Three weeks ago she began to lose her balance and her eyes were not bright like they used to be. She was hardly eating and spent most of her time just dozing . . . I spooned SomaPet on a bit of food three times a day for two weeks. She now has eyes that are clear and focused, her litter box area is clean, she asks to go outdoors, and this morning . . . she actually jumped up on my lap!"

V.T. Carp, ON

Benefits

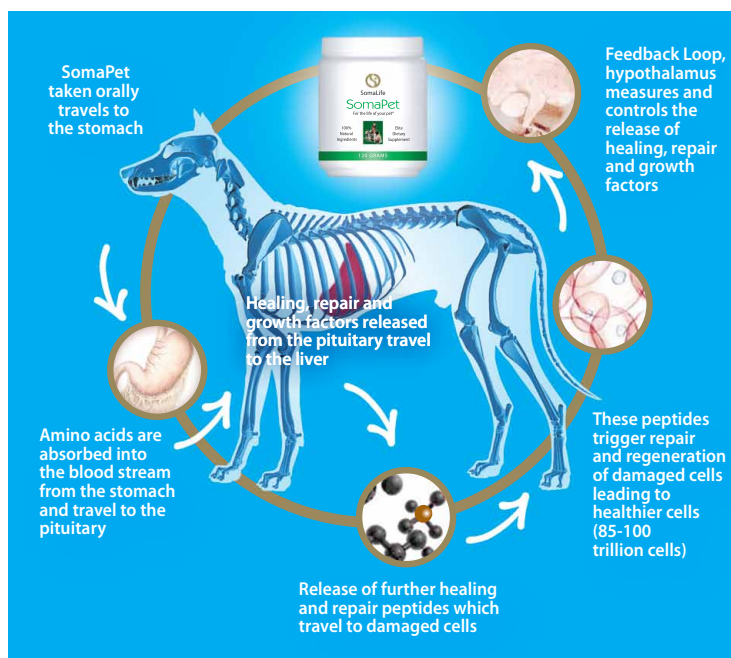

- **STRENGTHENS** Collagen & Bones!
- **IMPROVES** Immune System!
- **RENEWES** Vitality!
- **REDUCES** Body Fat!
- **HEALTHIER** Skin & Coat!

How SomaPet Works!

The following graphic illustrates how SomaPet works by showing the growth factors' journey from the pituitary gland and back again.

8 GREAT REASONS TO TRY SOMAPET

SomaLife's "SomaPet" is a dietary supplement in the truest sense of the word. It is a blend of eight amino acids designed to provide optimal nutritional support for your pet's body. SomaPet has had its constituent amino acids selected to provide the following benefits individually with further benefits as a whole:

L-arginine

gives excellent support to the cardiovascular system in multiple ways. It has been demonstrated to be of significant help in wound healing, recovery times for broken bones, surgery and weight loss.

L-lysine

provides dietary support for the immune system and can improve supplemental calcium absorption, as well as decrease urine calcium and calcium loss.

L-ornithine

as a dietary supplement it can support the production of anabolic hormones and reduce muscle stress from exercise.

L-glutamine

glutamine supplementation can assist pets that are exercising and burning significant amounts of energy in the muscle. Glutamine prevents muscle catabolism which can occur when exercising hard as the muscles can supply glutamine for other cells in the body, and unless supplemented, can become deficient. It also helps maintain cell volume and hydration and as such will speed up healing.

Glycine

is used to help create muscle tissue and convert glucose into energy. It is also essential to maintaining healthy central nervous and digestive systems, and has recently been shown to provide cell protection via antioxidants. It helps regulate blood sugar levels, and thus glycine supplementation may be useful for treating symptoms characterized by low energy and fatigue.

L-leucine

Leucine, and supplemental leucine, helps with the regulation of blood sugar levels as well as the growth and repair of muscle tissue, bones and skin.

L-isoleucine

promotes muscle recovery after physical exercise and on its own is needed for the formation of hemoglobin (the primary oxygen-carrying constituent of red blood cells), as well as assisting with regulation of blood sugar and energy levels.

L-valine

is required for muscle metabolism, repair and growth of tissue and maintaining the nitrogen balance in the body. Since it is a branch-chain amino acid, it can be used as an energy source in muscles, and in doing so, preserves the use of glucose. Valine will support muscle maintenance, growth, tissue repair, muscle energy and maintains balance in these areas.

SUPPLEMENT FACTS

Serving Size: 1-2 Scoops Servings Per Container: 30-60

	Amount per serving	% Daily Value
L-Lysine HCl	500 mg	*
L-Arginine HCl	500 mg	*
L-Ornithine HCl	260 mg	*
L-Glutamine	220 mg	*
Glycine	120 mg	*
L-Leucine	120 mg	*
L-Isoleucine	120 mg	*
L-Valine	120 mg	*

* Daily Value not established

Other ingredients: magnesium stearate.

SomaPet contains no artificial flavor, color, preservatives, sucrose, starch, gluten, dairy or yeast. Due to the all natural ingredients in this product, color and odor variations may occur.

Suggested Use

SomaPet is in a powder form and can be easily mixed with your animals' usual meal. Animals may take SomaPet with food as their diet is low in sugar and refined carbohydrates, thus minimizing the effect their food may have on this product.

Animal Weight: up to 50 lbs = 1 scoop*
over 50 lbs = 2 scoops*

*slightly rounded scoop(s) per day.
1 rounded scoop = approx. 2 grams.

Warning: Keep out of the reach of children. Do not use if seal is missing or broken. Store at room temperature.

Manufactured in the United States for: SOMALIFE
